

## How to: Connect Korona

The following steps must be performed to connect to Korona and import the products:

### Activate mapAds via Korona

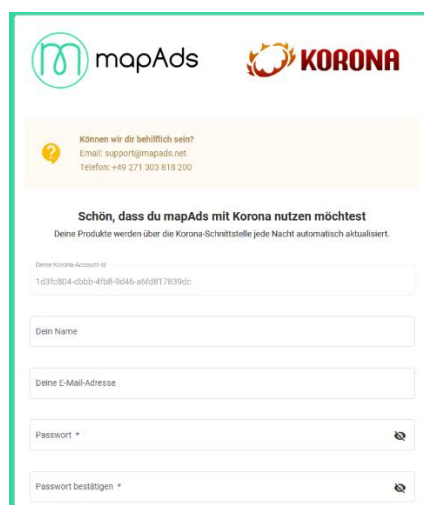

- Log in to the Korona Cloud
- Via "Settings" and "Data Exchange" you can enter "mapAds" in the search bar and press "Add":

- The "mapAds" widget is added to the list.

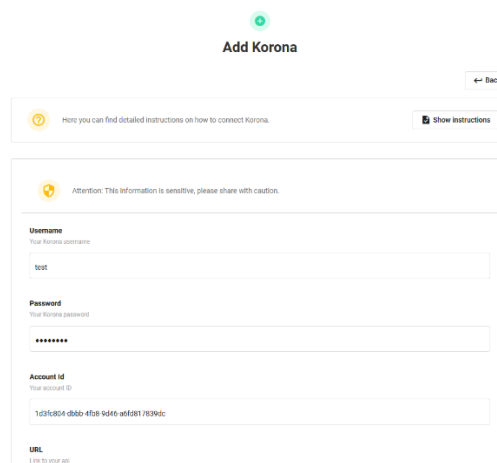

- The button "To mapAds" will redirect you to mapAds, where you can then register:

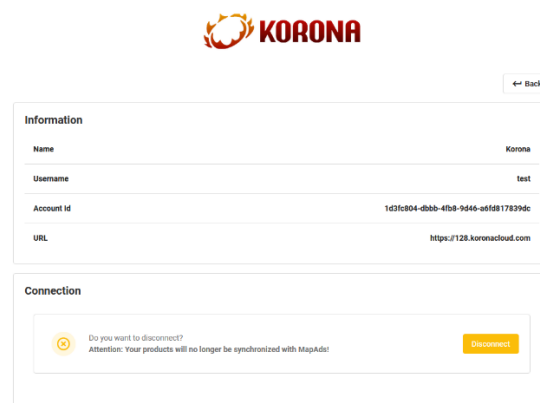

- Done! - All products that you have tagged with the keyword "mapAdsPromotion" will be synchronized with mapAds every night.

## Connect Korona via mapAds software

- You need to activate the widget in Korona as described above.
- Navigate to the following overview: <https://user.mapads.net/mapAds/settings/external-systems>
- Click on "Add new system"
- Click "Add" on Korona
- Enter your Korona information in the form and click "Connect":

- Among your connected systems you will now find Korona.

- Done! - All products that you have tagged with the keyword "mapAdsPromotion" will be synchronized with mapAds every night.
